Subject: DREDGING

As you can see at the top of this e-mail, my name is Tom Munoz. I live at 15713 Kelso Rd. My house is about ¼ mile north of the Old River Barrier. Last year about this time, they were dredging in my area, but for some unknown reason, they did not come down my way. They went all the way into Rivers End Boat Harbor, (Del's Boat Harbor) and all around Middleton's Island, and about south 3 houses. I took pictures, called, sent e-mails, went to meetings with the pictures of over half my docks on mud. All this mud started right after the barriers were put in. If all this work you are planning on doing here in my area, means that we will get our river dredged some, I'm for it, but if not. I stand as before, very upset, and nothing I can do. I don't even know if you are the right people to be writing this e-mail but you deal in water, and that's my problem. All I'm asking is to have someone come by and see the mess I have. You have my e-mail, may be just a call 209-836-1049. Thanks Tom Munoz
